

## Press release

**Date:** March, 1, 2020

**Editor:** Klaus Teders

### **Wera is sitting in the screwdriving time machine**

### **Turn on the Turbo!**

**Wuppertal.** The Tool Rebels from Wera had it in their heads to develop a screwdriver with almost unbelievable speed, which works very precisely and - at the end - also enables powerful screwdriving.

A part time universal gear is the solution: integrated in the handle of the new Kraftform Turbo screwdriver; it quadruples the working speed!!!

The Kraftform Turbo accelerates screwdriving in a purely mechanical way - without electricity.

The turbo function can either be switched on or off by pressing a button. Turning it off is recommended for fine adjustment and final tightening or loosening of a high torque screw.

The robust steel design of the planetary gear unit is maintenance-free and ensures a long product life.

Thanks to the Rapidaptor bit holder, the Kraftform Turbo can be used with all conventional 1/4" hexagon bits for a wide variety of screw profiles.

With the Rapidaptor function the bits can be inserted directly and can be easily removed by pushing the sleeve forward - allowing single hand operation.

In the version for electricians, the Kraftform Turbo and the individually tested Wera VDE interchangeable blades guarantee fast and safe working even under tension.

## Captions:

### 01 Wera\_Kraftform-Turbo\_Anwendung

With the new Kraftform Turbo from Wera, screwdriving operations can be carried out considerably faster - and all without electricity.

### 02 Wera\_Kraftform-Turbo\_Getriebe

The Kraftform Turbo screwdriver is equipped with a planetary gear that can be switched on or off at the touch of a button.

### 03 Wera\_Kraftform-Turbo\_Übersetzung

The transmission in the power form Turbo increases the working speed four times. One turn of the handle triggers four turns of the blade.

#### 04 Wera\_Kraftform-Turbo\_Elektro

The version for electricians in connection with VDE interchangeable blades allows fast and safe working even under voltage.
